

*I am happy to confirm that during the last seven years Joan Baiget has worked for me in the capacity of EDP Manager. Throughout this period of time we faced and overcame many problems associated with a business which was geographically fragmented and undergoing a phase of rapid growth in the Spanish market. I believe it is true to say that we were pioneers in Spain in the area of dedicated line and X25 packet switching communications and probably the same could be said about local area PC networks (LAN's).*

*Joan has always demonstrated versatility and conscientiousness in his work which has sometimes demanded long hours and frequent travel, especially between Tarragona and Madrid. He has the ability and self-confidence to resolve day-to-day problems and at the same time plan and implement long term systems solutions. He is always aware of the need to keep up-to-date with the theory and developements in his discipline which is characterised by rapid change and endeavours to spend the necessary time studying and attending courses to achieve this.*

*I can honestly say that it has been a pleasure to work with Joan during this time and can only hope that he reciprocates this sentiment.*
